Conf-IRM 2025

Conference Theme: **Conference Theme: Embracing an Intelligent Future, Hosted by the Boğaziçi University, Istanbul, Turkiye, 23-25 June 2025**

Track Title: IS for Development, Diversity, Inclusion and Equality in Digital Futures

Authors are encouraged to employ a problematization approach (*cf. Alvesson & Sandberg, 2011*), which involves identifying key stakeholders and framing research questions that address their perspectives and needs. This approach ensures research that reflects the social, environmental, and ethical implications relevant to a broad audience. By considering non-economic impacts and the interests of diverse stakeholders, authors can provide insights with practical significance beyond academic audiences. We particularly welcome empirical studies that explore the social implications of ICT innovation and inspire sustainable, responsible, and inclusive applications of technology.

Possible topics

- Topics of interest include, but are not limited to:
- Ethical AI implementation
  Digital Inclusion and Access
- Bridging digital divides
- Technologies for marginalized communities
- E-learning and digital literacy
- Nature-based digital solutions
- Climate change and ICT
- Environmental monitoring systems

(Alvesson, M., & Sandberg, J. (2011). Generating research questions through problematization. Academy of Management Review, 36(2), 247-271.)

Track Co-Chairs

- Malcolm Garbutt, University of Western Cape, South Africa, **mgarbutt@uwc.ac.za**
- Maryam Mirzaei, Auckland University of Technology, New Zealand, **maryam.mirzaei@aut.ac.nz**
