

PHIL 132 Logic II

Cem Şişkolar

cem.siskolar@pt.bogazici.edu.tr

Department of Philosophy, Boğaziçi University

Summer 2026

COURSE DESCRIPTION

PHIL 132 is a course in formal deductive logic, the continuation of PHIL 131, which is a pre-requisite. It covers predicate logic with polyadic predicates and identity.

AUDIENCE

PHIL 132 is required for Philosophy undergraduates. Motivated students from other majors who have already completed PHIL 131 or an equivalent are also welcome, **subject to the quotas**.

ASSESSMENT

Attendance (10%)

Regular attendance is encouraged.

Weekly Quizzes (30%)

Short **in class** quizzes will be assigned weekly

Midterm (25%)

There will be **one** one-hour in-class exam.

Final Exam (35%)

A comprehensive in-class exam covering all course material.

TEXTBOOK

We will cover Chapters 4 and 5 of the 2013 edition of *An Exposition of Symbolic Logic* by Terence Parsons. I will upload the PDF to Moodle.
